Summary

i made a nice feeling solid string winder for guitar

[Hobby & Makers](#) > [Music](#)

Tags: [guitars](#) [tuning](#) [stringwinder](#)

So i didn't have a string winder so i made one. then it didn't fit one of my guitars so i made another that did fit it. and now i have two different string winders.

They print without supports the small version is upside down, please flip it, don't try and print it that way. or you can, its your own choice i guess. They are put together with one 10mm M4x0.7mm screw just threaded into the hole. i wanted a simple solid feeling winder and that's pretty much what i got.

hope you like it, happy printing!
